

SECUINFRA meets all requirements:

ISO 27001 certification as next milestone

Berlin, July 11, 2022 – SECUINFRA GmbH has been certified for its strict compliance with the leading international standard for information security in accordance with the requirements of the ISO standard ISO/IEC 27001:2013. “With this approach, SECUINFRA fulfills the expectations placed on it as a leading cyber defense company and, as a Managed Security Service Provider (MSSP), consistently fulfills its mission for information management,” enthuses Ramon Weil, Founder and CEO of SECUINFRA.

The company received ISO 27001 certification for its Information Security Management System (ISMS) from TÜV Thüringen, the responsible independent testing organization. The certificate confirms that SECUINFRA carries out all security-relevant IT and business processes with the company’s internal guiding objectives of “confidentiality, integrity and availability”. This means that the cyber defense expert fully complies with all leading international standards for information security. “With this approach, we meet the expectations placed on us as a leading cyber defense company and, as a Managed Security Service Provider (MSSP), we take the information management mission in stride. Only in this way can we ensure confidentiality, integrity and availability as indispensable success factors for our customers, partners and service providers alike,” emphasizes CEO Weil.

Entire company covered

As part of the certification process, all security-relevant IT and business processes were scrutinized by the inspection body. The scope thus covers the entire organization of the company – from order acquisition to the provision of services in the area of cyber defense with a focus on SIEM as well as forensic analyses to final billing at the Frankfurt and Berlin sites. The entire ISMS was implemented in advance by the Berlin-based company, maintained and continuously improved using the PDCA cycle (Plan, Do, Check, Act).

Moving into new dimensions

Thanks to the implementation of the corresponding organizational and technical measures, which are also required by law, official proof of compliance with these requirements of an ISMS certified in accordance with ISO/IEC 27001 has now been provided by TÜV Thüringen. Much to the delight of Managing Director Weil: “ISO 27001 certification is a departure into new dimensions for our company. It is also a clear mandate for us to meet our high quality standards for our customers and partners at all times.”
